Newham Council is committed to making cycling and walking safer, and more attractive to people of different ages and abilities.

As part of the Transport for London Quietways programme, we are proposing a series of upgrade works to existing ramps and new ramps to improve access to the Greenway from local neighbourhoods.

These improvements will make ramps more accessible for people with buggies, wheelchair users and cyclists.

A new ramp to improve links from Greenway to West Ham Memorial Recreation Ground is proposed.

This will be located directly next to the existing steps to the Greenway, on the northern boundary of the Memorial Recreation Ground.

The proposals include:

- A new 3 metre wide ramp with a shallow gradient at 1:20 and with landings
- Removing a section or the entire length of the wall and existing mural to create the new ramp
- A new gate at the top of the ramp with the same opening hours as the steps
- New lighting and CCTV coverage of the new ramp
- Improvements to the existing steps

We are also looking into:

- New planting and seating as part of the new ramp design
- Upgrading the existing footpath near the steps and proposed ramp, to make it wider and provide a smoother more accessible surface
- New lighting and CCTV coverage for the footpath

Subject to approvals, we aim to start works in summer 2017 and complete these by spring 2018.

To share your views on the proposals email Quietways@newham.gov.uk by Monday 15 May 2017.

As part of the Transport for London Quietways programme, we are proposing a series of upgrade works to existing ramps and new ramps to improve access to the Greenway from local neighbourhoods. These improvements will make ramps more accessible for people with buggies, wheelchair users and cyclists.

Upgrade works are proposed to the existing ramps at Stokes Road and Lonsdale Avenue to improve links to the Greenway.

The proposals include:

- Increasing the length of the existing ramps to make them less steep (1:15 with landings) and wider
- Improvements to the existing steps
- Better lighting and CCTV coverage of the ramps
- New planting and landscaping on the ramps

Subject to approvals, we aim to start works in summer 2017 and complete these by spring 2018.
