

POLLUTION PREVENTION AND CONTROL ACT 1999 Environmental Permitting (England and Wales) (Amendment) Regulations 2012

Environmental Permit

Name and address of company (A) authorised to operate the installation ('the operator')

Lafarge Tarmac Trading Limited Knights Road Silvertown London E16 2AT

Lafarge Tarmac Trading Limited ("the operator")

Whose registered office is

Lafarge Tarmac Trading Limited Portland House Bickenhill Lane Solihull Birmingham B37 7BQ

Company registration number: 004753791

Permit reference LA 170/15

Effective date 1st March 2015

Signed on behalf of the regulator (the London Borough of Newham)

Environmental Health Officer

Description of permitted activities

The Operator (A) is authorised to operate an activity at the installation that involves the blending of cement in bulk other than at a construction site including the bagging of cement and cement mixtures, the batching of ready mixed concrete and the manufacture of concrete blocks and other cement products in England and Wales subject to the following conditions

Listed in (b) of Section 3.1 Part B in Part 2 of Schedule 1 to the Environmental Permitting Regulations.

Permit conditions

Emissions and monitoring

- 1. No visible particulate matter shall be emitted beyond the installation boundary as indicated in Schedule 1 (Site Boundary Plan).
- 2. The emission requirements and methods and frequency of monitoring set out in Table 1 shall be complied with. Sampling shall be representative. Any monitoring display required for compliance with the permit shall be visible to operating staff at all times. Corrective action shall be taken immediately if any periodic monitoring result exceeds a limit in Table 1, or if there is a malfunction or breakdown of any equipment which might increase emissions. Monitoring shall be undertaken or repeated as soon as possible thereafter and a brief record shall be kept of the main actions taken. activation. *Alarms shall be tested at least once a week.*
- 3. All plant and equipment capable of causing, or preventing, emissions and all monitoring devices shall be calibrated and maintained in accordance with the manufacturer's instructions.

Silos where used

- 4. Bulk cement shall only be stored within cement silos as indicated on Schedule 1.
- 5. Dust emissions from unloading of road tankers shall be minimised by venting to arrestment plant serving the silos as indicated on Schedule 1 and back venting to a delivery tanker fitted with an on-board, truck mounted relief valve and filtration system. Venting air from the tanker at the end of a delivery will not take place through the silo.
- 6. Silos and bulk containers of dusty materials shall not be overfilled and there shall be an overfilling alarm.
- 7. Deliveries must automatically stop where overfilling or over-pressurisation of silos is identified.

8. Displaced air from pneumatic transfer shall pass through abatement plant prior to emission to air

Aggregates delivery and storage

9. Dusty materials (including dusty wastes) shall only be stored in purpose designed storage bays as detailed in Schedule 1 as attached to this permit and shall be subject to suppression and management techniques to minimise dust emissions

Belt conveying

10. All dusty materials, including wastes, shall be conveyed using conveyor belt system as indicated on Schedule 1 as attached which shall be covered so as to prevent visible dust emissions.

Loading, unloading and transport

11. No potentially dusty materials (including wastes) or finished products shall arrive on or leave other than in vehicles that are fully enclosed. Cement and other powdered cementitious materials to be delivered by road bulk tankers.

Roadways and transportation

- 12. All areas where there is regular movement of vehicles shall have a consolidated surface capable of being cleaned, and these surfaces shall be kept clean and in good repair. Quarry haul roads are excluded from this provision.
- 13. Vehicles shall not track material from the site onto the highway.

Techniques to control fugitive emissions

14. The fabric of process buildings shall be maintained dust tight and doors shall be kept closed when not in use and be maintained so as to minimise visible dust emissions.

Records and training

- 15. Written or computer records of all tests and monitoring shall be kept by the operator for at least 3 years. They and a copy of all manufacturers instructions referred to in this permit shall be made available for examination by the Council. *Records shall be kept of operator inspections, including those for visible emissions.*
- 16. Staff at all levels shall receive the necessary training and instruction to enable them to comply Written or computer records of all tests and monitoring shall be kept by the operator for at least 3 years.

Best available techniques

17. The best available techniques shall be used to prevent or, where that is not practicable, reduce emissions from the installation in relation to any aspect of the operation of the installation which is not regulated by any other condition of this permit.

18The operator must notify the regulator in writing at least 14 days before making any changes in operation of the installation. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition "change in operation" means a change in the nature or functioning, or an extension, of the installation, which may have consequences

Row	PROVISION	Source	Emission limits/	Type of monitoring	Monitoring Frequency
1	Particulate Matter	Whole Process	provisions No visible airborne emission to cross the site boundary where harm or nuisance may be caused	Operator Observations	Daily
		Silo inlets and outlets	No visible emissions	Operator Observations	At time of delivery
2	Droplets, Persistent mist and fume	All emissions to air (except steam and condensed water vapour)	No droplets, no persistent mist, no persistent fume.	Visual observations	On start-up and on at leas two more occasions during the working day*

Right to Appeal

You have the right of appeal against this permit within 6 months of the date of the decision.

The

Council can tell you how to appeal [or supply details with the permit]. You will normally be expected

to pay your own expenses during an appeal.

You will be liable for prosecution if you fail to comply with the conditions of this permit. If found

guilty, the maximum penalty for each offence if prosecuted in a Magistrates Court is £50,000 and/or

6 months imprisonment. In a Crown Court it is an unlimited fine and/or 5 years imprisonment.

Our enforcement of your permit will be in accordance with the Regulators Compliance Code.

EXPLANATORY NOTES

The activities authorised by this Permit shall not extend beyond the installation boundary that being the land shown as edged in red on Schedule 1 as attached to this Permit, and described in the Permit.

This Permit shall be subject to replacement, variation or amendment as may be considered appropriate by Newham Council, at any time, according to the provisions of Regulation 20 of the EP Regulations.

The Permit includes conditions that must be complied with. Failure to comply with the conditions within the Permit means Newham Council may take enforcement action against the Operator. It should be noted that aspects of the operation of the installation that are not regulated by those conditions, are subject to the conditions implied in the Regulation 12(a) authorised by the environmental permit of the EP Regulations. The operator shall use the Best Available Techniques (BAT) in accordance with Chapter 12 of General Guidance Manual on Policy and Procedure for A2 and B installations and in accordance with condition 17 of this permit for preventing or, where that is not practical, reducing emissions from the installation. Techniques include both the technology used and the way in which the installation is designed, built, maintained, operated and decommissioned. Effective control of emissions requires the maintenance and proper use of equipment, and the proper supervision of the process operations. Adequate preventative maintenance should be undertaken on all plant and the equipment concerned with the control of emissions to the air. Essential spares and consumables should be held or should be available at short notice from guaranteed local supplies. Staff at all levels should receive the necessary formal training and instructions in their duties relating to control of the process and emissions to air. Particular emphasis should be given to training for start-up, shut down and abnormal conditions. Good housekeeping should be practised at all times. Permit relates to the control of air emissions from a prescribed activity from the named Installation. The Permit does not detract from any other statutory requirement, such as the need to obtain planning permission, hazardous substances consent, discharge consent from the Environment Agency, building regulations approval, or a waste disposal licence. In addition, it must not be taken to replace any responsibilities for health, safety and welfare in the workplace under workplace Health and Safety legislation.

Commercial Confidentiality and the Public Register

The Permit requires the Operator to provide information to Newham Council. In accordance with the requirements of the of the Environmental Permitting Regulations (England and Wales) Regulations 2010, (EP Regulations) the Council will place certain information (including the Permit) onto a public register. If the operator considers that any information provided is commercially confidential, it may apply to the London Borough of Newham to have such information withheld from the register. To enable the London Borough of Newham to determine whether the information is commercially confidential the operator should clearly identify the information in question and should specify clear and precise reasons. The public register is held at the offices of Environmental Health (see below for address) and is available to view during working hours.

Variations to the Permit

The conditions imposed do not in any way inhibit the ability of the installation to change or develop. If at any time the activity or any aspect of the activity regulated by the Permit

conditions is changed such that the conditions no longer reflect the activity and require alteration, the operator shall inform the London Borough of Newham. The London Borough of Newham will then issue a Variation Notice under regulation 20 of the EP Regulations (or a new Permit if the changes mean a consolidated version is more appropriate).

Appeal against Permit Conditions

Anyone who is aggrieved by the conditions within the Permit can appeal to the Secretary of State for the Environment, Food and Rural Affairs (DEFRA). Appeals must be made in accordance with the EP Regulations under the provisions of Schedule 6 Appeals should be received by the Secretary of State for DEFRA at:

The Planning Inspectorate, Environment Team Major & Specialist Casework Room 4/04 Kite Wing Temple Key House, 2 The Square Temple Key Bristol BS1 6PN

0117 372 8726

An appeal brought under in relation to the conditions in a Permit will not suspend the effect of the conditions appealed against; the conditions must still be complied with. In determining an appeal against one or more conditions, the Regulations allow the Secretary of State to quash any other conditions not subject to the appeal and to direct Newham Council either to vary any of these other conditions to add new conditions.

Surrender and Revocation of the Permit

Where an operator intends to cease the operation of an Installation (in whole or part)
Newham Council should be informed in writing. Such notifications must include the
information specified in regulations 20-25 of the EP Regulations. Newham Council will issue
a revocation notice under regulation 22. The London Borough of Newham may also revoke
the Permit if the operator contravenes relevant sections of the EP Regulations.

Fees

In accordance with regulation 65 of the EP Regulations, the holder of a Permit is required to pay a fee for the subsistence of the Permit. This fee is payable annually on 1 April and the operator will be sent an invoice for the amount accordingly; the amount payable is reviewed and published annually by central government. You are advised that under the provisions of regulation 22 of the EP Regulations, if you fail to pay the fee promptly, Newham Council may revoke the Permit.

Transfer of the Permit or Part of the Permit

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by both the existing and proposed holders, in accordance with regulation 24 of the EP Regulations. A transfer will be allowed unless Newham Council considers that the proposed holder will not be the person who will have control over the operation of the installation or will not ensure compliance with the conditions of the transferred permit.

Advice on notifying Newham Council on activity changes, which may either be relevant or substantial, can be found in Regulation 20 and in the General Guidance Manual. Operators will be liable to enforcement action if they make a change without approval that means <u>either</u> the activity (as changed) is no longer the activity which is permitted, or a condition of the Permit is not being complied with as a result of the change being made. Variations can be documented in the table given at the end of this introductory note.

With regard to any aspect associated with the Permit, please contact London Borough of Newham on:

Pollution Control Unit, London Borough of Newham, Newham Dockside, 1000 Dockside Road, London E16 2QU e-mail:pollution.inquiry@newham.gov.uk
