Table of contents

Appendix 1: Comparison of 2011 and 2021 Census London Gypsy and Traveller population figures	2
Appendix 2: Accommodation needs identified by GTANAs undertaken in London since 2008.....	4
Appendix 3: GTANAs undertaken in London since 2008	7
Appendix 4: Gypsy and Traveller households residing in bricks and mortar accommodation and on sites, by tenure, 2011 and 2021	9
Appendix 5: DLUHC Caravan Count January 2024 and caravans on authorised and unauthorised pitches from January 2016 to January 2024.....	13
Appendix 6: Roma population by London borough, March 2021	19
Appendix 7: Gypsy and Traveller pitches in London, 2008 and 2022.....	20
Appendix 8: Summary information on GTANAs undertaken in London since March 2019 used to determine where new fieldwork should take place	22
Appendix 9: Bedroom standard.....	33
Appendix 10: Organisations that responded to the stakeholder consultation.....	34
Appendix 11: Stakeholder consultation questions	36
Appendix 12: Example negotiated stopping protocol (Leeds GATE)	38
Appendix 13: Accommodation supply and needs by borough	40
Appendix 14: Response rates to the survey of Gypsy and Traveller households residing in bricks and mortar homes	138
Appendix 15: Response rates to the Roma household survey	139
Appendix 16: Stakeholder consultation	140
Appendix 17: Policy background	153

Appendix 1: Comparison of 2011 and 2021 Census London Gypsy and Traveller population figures

Please note that the 'Gypsy and Traveller population' figures include both Gypsies and Travellers living on sites, and those living in bricks and mortar homes. The red text denotes a decrease in population between 2011 and 2021.

Borough			2011 Census			2021 Census		Difference
	Usual population (no.) (2011)	Gypsy and Traveller population (no.) (2011)	Gypsy and Traveller population (%) (2011)	Usual population (no.) (2021)	Gypsy and Traveller population (no.) (2021)	Gypsy and Traveller population (%) (2021)	Change (no.)	Change (%)
Barking and Dagenham	185,911	182	0.10%	218,871	184	0.08%	2	-0.01%

- Only some GTANAs separate accommodation needs into the following categories: households who meet the PPTS planning definition; households whose planning status is unknown; and households who do not meet the PPTS 2015 planning definition. The dash ('-') denotes that the GTANA did not include these categories. This differs from cells that contain '0', which indicates that the assessment found a need of nil.

* Please note that the relevant PPTS depends on when the GTANA was undertaken.

** .The need for bricks and mortar in London GTANA 2008 is made up of 458 homes for Roma and 0 for Gypsies and Travellers.

*** Barnet, Brent, Ealing, Harrow, Hillingdon and Hounslow published a joint GTANA in October 2018.

Appendix 3: GTANAs undertaken in London since 2008

Please note the OPDC area lies in the London boroughs of Hammersmith and Fulham, Brent, and Ealing. The LLDC area lies in the London boroughs of Newham, Hackney, Tower Hamlets and Waltham Forest.

Also, please note that the first four GTANAs in the table – i.e. London (2008), Croydon (2013), Camden (2014), and Sutton (2015) – were undertaken before PPTS 2015 was published, so they did not determine a cultural need.

No.	Borough(s)	GTANA date	Consultant	Does the GTANA determine cultural need?	GRT communities included in the assessment*	Period of need

Source: Census 2021 cited by Nomis 2022

As highlighted in the GTANA, the 2011 Census did not include a specific category for Roma. The 2021 Census was the first Census to feature Roma as a distinct ethnic category.

Appendix 7: Gypsy and Traveller pitches in London, 2008 and 2022

Please note that the 80 'unauthorised pitches' recorded in 2008 includes both unauthorised encampments and unauthorised developments. The red figures show a decrease in provision.

Appendix 8: Summary information on GTANAs undertaken in London since March 2019 used to determine where new fieldwork should take place

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
1	Havering	March 2019	ORS	No	131 out of 141 (93%) interviews with Gypsy and Traveller households residing on pitches, and one household residing in a bricks and mortar home.	Considers the accommodation needs of Gypsy and Traveller households residing on pitches, in bricks and mortar homes, and transit provision, and Travelling Showpeople households. Does not consider the accommodation needs of the Roma community.	Does not accord with the draft London Plan 2018 definition, although there is sufficient evidence to determine needs in accordance with this definition.	Gypsies and Travellers: 174 new pitches for households who meet the PPTS definition; 43 for households who do not meet the PPTS definition; and three for households whose status is 'unknown'. Households residing in bricks and mortar homes: no need. Travelling Showpeople: five additional plots needed. Transit provision: recommends the implementation of a negotiated stopping policy.	No
2	Wandsworth	April 2019 (updated January 2022)	Internal	Yes	Seven of 11 (64%) households residing on a site, and two of seven	Assesses the accommodation needs of Gypsy and Traveller	Existing GTANA based on secondary data, so	Gypsies and Travellers: no new pitches.	Yes

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
					(29%) on a waiting list.	households residing on an 11-pitch local authority site, and on the waiting list. Does not consider the accommodation needs of the Roma community.	new fieldwork required.	Households residing bricks and mortar homes: no need. Travelling Showpeople: no yards in borough. Transit provision: not determined.	
3	Bexley	April 2019	Arc4	Yes	15 interviews with households residing on 25 occupied pitches (60%).	Considers accommodation needs of Gypsy and Traveller households residing on pitches, in bricks and mortar homes, and transit provision (no Travelling Showpeople live in the borough). Does not consider the accommodation needs of the Roma community.		The GTANA identified sufficient pitches available for the period 2017-18 to 2021-22; and an overall need for 3.2 pitches to 2036 based on a cultural definition of need, and 0.4 pitches to 2036 using the PPTS definition. Households living in bricks and mortar homes: no need. Travelling Showpeople: no yards in the borough. Transit provision: recommends a tolerated stopping policy.	No

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
4	Merton	July 2019	RRR	Yes	13 interviews with households residing on 13 occupied pitches (100%). Although no interviews were undertaken with households residing in bricks and mortar homes, the needs arising from this cohort was determined by estimating the proportion experiencing psychological aversion.	Considers accommodation needs of Gypsy and Traveller households residing on pitches, in bricks and mortar homes, and transit provision (no Travelling Showpeople live in the borough). Does not consider the accommodation needs of the Roma community.		Gypsies and Travellers: no additional need. Households living in bricks and mortar homes: six pitches for households who meet the draft London Plan (2018) definition; no pitches for households who meet the 'PPTS' definition; and no pitches for households who meet the 'work' definition. Travelling Showpeople: no yards in the borough. Transit provision: recommends the implementation of a negotiated stopping policy.	No
5	Islington	July 2019	RRR	Yes	No Gypsy and Traveller sites, or Travelling Showpeople yards, in the borough, although interviews with 10 households	Considers accommodation needs of Gypsy and Traveller households in bricks and mortar homes, and transit	Local authority would like findings to be updated by the 2023 GTANA.	Gypsies and Travellers: No sites in the borough. Households living in bricks and mortar homes: 10 pitches for	No

								implementation of a negotiated stopping policy.	
8	Barking and Dagenham	September 2020	ORS	Yes	12 interviews with households residing on 12 occupied pitches (100%) and 10 with households residing on unauthorised encampments. There were no interviews with households residing in bricks and mortar homes.	Considers the accommodation needs of Gypsy and Traveller households residing on pitches and transit provision (no Travelling Showpeople live in the borough). Does not consider the accommodation needs of the Roma community.		Gypsies and Travellers: 24 new pitches for households who meet the PPTS definition; seven for households who do not meet the PPTS definition; and none for households whose status is 'unknown'. Households living in bricks and mortar homes: no need. Travelling Showpeople: no yards in the borough. Transit provision: recommends the implementation of a negotiated stopping policy.	Yes
9	Enfield	October 2020	Arc4	Yes	Interviews with 12 Gypsy and Traveller households living in bricks and mortar homes (of which eight rented from	Considers the accommodation needs of Gypsy and Traveller households residing in bricks and mortar homes	.	The GTANA identified a need for 23 pitches, of which 21 derive from households who meet criteria	No

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
					the Council, or privately rented; and four were living in temporary accommodation), and three households on the road with a connection to Enfield.	and transit provision. There are no Gypsy and Traveller sites, or Travelling Showpeople yards, in the borough. Does not consider the accommodation needs of the Roma community.		set out in Annex 1 of the PPTS. Households living in bricks and mortar homes: the above includes a need of nine pitches deriving from households who live in bricks and mortar homes. Travelling Showpeople: no yards in the borough. Transit provision: recommends a transit site/stop over site for six pitches.	
10	City of London	March 2021	Internal	N/A	There are no Gypsy and Traveller sites, or Travelling Showpeople yards in the borough, although surveys could take place with households residing in bricks and mortar homes on City of London land.	Does not assess accommodation needs in the city.	This is part of a Topic Paper on housing, rather than a GTANA.	No sites or yards, so did not undertake an assessment of accommodation needs.	No
11	Bexley	October 2021	Arc4	Yes	15 interviews with households	Considers accommodation		The GTANA identified sufficient	No

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
					residing on 25 occupied pitches (60%).	needs of G&T households residing on pitches, in bricks and mortar homes, and transit provision (no Travelling Showpeople live in the borough). Does not consider the accommodation needs of the Roma community.		<p>pitches available for the period 2017-18 to 2021-22; and an overall need for 1.4 pitches to 2031-32 based on a cultural definition of need, and for 0.1 pitches using the PPTS definition.</p> <p>Households living in bricks and mortar homes: no need.</p> <p>Travelling Showpeople: no yards in the borough.</p> <p>Transit provision: recommends a tolerated stopping policy.</p>	
12	Haringey *		ORS	No	Not known	<p>Interviews with Gypsies and Travellers on sites and in bricks and mortar.</p> <p>There are no Travelling Showpeople yards in the borough. Does not consider the accommodation</p>	Did not want fieldwork duplicated in area	For the period 2021-2037, there is no identified need for Gypsies and Travellers who meet PPTS, between 0 and 1 pitches for households whose planning status is unknown, and 21 for households who	No

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
						needs of the Roma community.		do not meet the PPTS definition. Travelling Showpeople: no yards in the borough.	
13	Newham	Jun 2022	ORS	No	Interviews with 15 Gypsy and Traveller households living on one site (100%); three with households on roadside; and three in bricks and mortar homes.	Interviews or proxy interviews with 15 households residing on sites, three residing on the roadside, and three residing in bricks and mortar homes. There are no Travelling Showpeople yards in the borough. Does not consider the accommodation needs of the Roma community.	Unlikely to want fieldwork duplicated so soon.	Gypsies and Travellers: no new pitches for households who meet the PPTS definition; 23 for households who do not meet the PPTS definition; and none for households whose status is 'unknown'. Households living in bricks and mortar homes: no need. Travelling Showpeople: no yards in the borough. Transit provision: recommends the implementation of a negotiated stopping policy.	No
14	Richmond	February 2022	Internal	Yes	Interviews with all households residing on a 12-pitch site.	Interviews with Gypsy and Traveller households		Gypsies and Travellers: no need.	No

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
						residing on pitches, but not in bricks and mortar homes. There are no Travelling Showpeople yards in the borough. Does not consider the accommodation needs of the Roma community.		Households living in bricks and mortar homes: no need. Travelling Showpeople: no yards in the borough. Transit provision: recommends the implementation of a negotiated stopping policy.	
15	Wandsworth update	April 2022	Internal	No	The 2022 update uses the results of household interviews undertaken for the 2019 GTAA. No new interviews with households residing on the Trewint site.	Assesses the accommodation needs of Gypsy and Traveller households residing on an 11-pitch local authority site, and on the waiting list. Does not consider the accommodation needs of the Roma community.	.	Gypsies and Travellers: no new pitches. Households living in bricks and mortar homes: no need. Travelling Showpeople: no yards in the borough. Transit provision: not determined.	Yes
16	Hammersmith and Fulham, and Kensington and Chelsea	October 2022	Internal	No	Interviews with 10 of 18 households residing on the Stable Way site.	Assesses the accommodation needs of Gypsy and Traveller households residing on a 19-pitch local authority site. Does not	The Stable Way site is jointly managed by both boroughs.	Gypsies and Travellers: no new pitches in the first five-year period; one pitch in the second five-year period.	Yes – published after the London GTANA fieldwork was undertaken.

No.	Local authority	Completed	Author	Uses 2018 London Plan definition	Household survey response rates	Cohorts and needs covered	Notes	Accommodation needs	New fieldwork on sites and yards?
						consider the accommodation needs of the Roma community.		Households living in bricks and mortar homes: no need. Travelling Showpeople: no yards in the borough. Transit provision: not determined.	

* Please note that although Haringey GTANA has been completed, it is not yet publicly available.

Appendix 9: Bedroom standard

The bedroom standard used to identify overcrowding among households living in bricks and mortar homes, following the ONS approach,¹ is based on the ages and relationships of household members. A notional number of bedrooms is allocated to each household, in accordance with its composition by age, sex and relationship status of family members. A separate bedroom is allocated to each:

- married or cohabiting couple
- adult aged 21 years or more
- pair of adolescents aged 10-20, of the same sex
- pair of children aged under 10, regardless of sex.

Any unpaired person aged 10-20 is paired, if possible, with a child aged under 10 of the same sex; or, if that is not possible, given a separate bedroom. The same applies to any unpaired child aged under 10.

This standard is then compared with the actual number of bedrooms (including bedsits) available for the sole use of the household. Bedrooms not actually in use are counted, unless they are uninhabitable.

¹ ONS, [Overcrowding and under-occupancy by household characteristics, England and Wales: Census 2021](#), 23 August 2023

Appendix 10: Organisations that responded to the stakeholder consultation

Please note that respondents from local authorities included officers from the following types of services and departments:

- children and young people
- planning and planning policy
- financial inclusion
- housing
- mental health
- public health
- education services
- health services
- GRTTS services.

Appendix 11: Stakeholder consultation questions

Q1. Thinking of the following three groups – Gypsies and Travellers, Travelling Showpeople and the Roma community – what do you consider to be the main accommodation issues facing these groups in the area where your organisation works and in London generally? We understand that there will be overlap in the issues faced by these groups, but please highlight where you consider issues are specific to one of these groups.

Q2. To what extent, if at all, do you think that the current Gypsy and Traveller sites and Showpeople yards in the area where your organisation works meet the needs of the people who occupy them? Please expand on how these sites are, or are not, fit for purpose.

Q3. Is there a need for additional accommodation for the Gypsy and Traveller, Travelling Showpeople, and Roma communities in the area where your organisation works?

Q4. What are the main barriers to providing new accommodation for the Gypsy and Traveller, Travelling Showpeople, and Roma communities in the area where your organisation works?

Q5. What would help to address these barriers?

Q6. Please outline the main travelling patterns of Gypsies and Travellers and Travelling Showpeople in the area where your organisation works, including a) when (what times of year) they travel, b) where they travel from and to, and c) why (for what purpose) they travel.

Q7. In the last few years has the number of roadside encampments in the area where your organisation works increased or decreased? What are the main reasons for roadside encampments taking place?

Q8a. To which, if any, of the following services do you think the local Gypsy and Traveller, Travelling Showpeople and Roma communities lack sufficient access? (Please select as many as relevant.)

- A local GP practice
- Mental health care
- Emergency health care
- Primary education
- Secondary education
- Further/higher/adult education
- Children's social care
- Adult social care
- Support for older people
- Policing
- Other (please state below)

Q8b. If you selected the 'other' option above, please explain your choice.

Q9. What do you consider the main barriers to Gypsy and Traveller, Travelling Showpeople and Roma communities accessing these services?

Q10. In what ways do local authority departments and service providers communicate and coordinate well in relation to meeting the needs (for example accommodation, health, education etc) of the Gypsy, Traveller, Showpeople, and Roma communities?

Q11a. Are you aware of good practice in relation to meeting the needs of the Gypsy, Traveller, Showpeople, and Roma communities (for example, accommodation, health, education, etc) that could be adopted by other local authorities and service providers in London? If yes, please provide further details.

Q11b. If yes, are you willing for us to contact you about the above?

- Yes
- No

Q12a. The GLA is working with boroughs to set up a borough-led information network on Gypsies and Travellers to share good practice and keep boroughs updated on the London-wide GTANA. There will be four meetings per year. Would you like to join this network?

- Yes
- No

Q12b. If yes, are you willing for us to share your contact details with the GLA for this purpose?

- Yes
- No

Q13. Your insights are valuable to our understanding the needs of London's travelling communities. Are you willing for us to contact you to clarify any responses?

- Yes
- No

Q14. Is there anything else you would like to add?

Appendix 12: Example negotiated stopping protocol (Leeds GATE)²

This agreement is between [Local Authority] and [named head of family]

This agreement relates to the time limited toleration of your encampment on [Local Authority] owned land adjacent to xxxx. The land is shown on the appending map.

The Council is currently willing to tolerate your encampment on the site for a short period of time until xxxx. The Council recognises its legal obligations to carry out needs assessment prior to initiating legal action to recover possession of land.

[Local Authority] reserves the right to terminate this agreement, and to seek to recover possession of the land through court proceedings, at an earlier date if the terms set out below in this agreement are breached.

I, and my family agree to adhere to the following terms:

1. You will be asked to park your caravan and vehicles in a designated place on the site. This is to prevent further caravans joining the encampment. Your family must stay within the boundaries of the site.
2. You will be issued with a toilet. This is for the sole use of your family, you will have to ensure this is kept in a reasonable condition. This will be emptied weekly.
3. You will be issued with a bin for all your domestic waste. You are responsible for keeping the area around your caravan clean and tidy. The bin is for the sole use of your family, you will have to ensure this is kept in a reasonable condition. This will be emptied weekly.
4. All dogs must be kept under control and tied up. Dogs must be tied up on a lead or in a kennel during the night or when you leave the site for any period of time. The dog wardens will visit this site if loose dogs are reported.
5. No fires larger than a small cooking fire are to be lit, absolutely no burning of commercial or domestic waste is allowed.
6. The nearest Household Waste for larger items is at Trade waste can be disposed at
7. Environmental enforcement officers will monitor the site and take action against any activity likely to cause environmental harm, inconvenience or distress to surrounding occupants such as fly-tipping, excessive noise or use of quad bikes.
8. Give consideration to other people within the local vicinity in terms of noise nuisance and the parking of vehicles.
9. Not to engage in any anti-social behaviour, disorder or fly tipping on or near this site. Horses will not be tolerated on the site and the presence of horses may be regarded as 'anti social behaviour' for the purposes of this agreement. Any traps owned by families are not to be used in or around the immediate area.
10. This agreement has been negotiated between [Local Authority] and Gypsy/Traveller people in the [local] area. You are encouraged to cooperate with the Local Authority to make

² LeedsGATE: Gypsy and Traveller Exchange, [Example negotiated stopping protocol](#)

the agreement work by discussing any incidents, concerns or suggestions that may affect the agreement with local authority officers when they visit weekly. You can also telephone the council [phone number], [police liaison officer] or speak to staff at [Third party advocacy where available] if you want them to raise issues on your behalf.

I understand the above points which have been explained to me, and I agree.

London Borough of Barnet

Need for pitches for Gypsies and Travellers:

Current pitches

As there are no known pitches (either authorised or unauthorised) within the borough, there is no existing or additional supply.

Need for pitches

Whilst there are no known pitches within the borough, there is evidence of need for pitches from households living in bricks and mortar homes. This is based on the findings from the online survey with those living in bricks and mortar homes.

Table 1: Summary of need for pitches for Gypsies and Travellers 2022-23 – 2026-27

1) Current occupied permanent residential site pitches	0
2) Number of unused residential pitches available	0
3) Number of existing pitches expected to become vacant through mortality	0

Appendix 16: Stakeholder consultation

Summary

This Appendix reports findings from the stakeholder consultation described in Chapter 4. For this consultation, we carried out an online survey of local authorities in London and the wider South East, and organisations that represent and provide services for GRTTS communities.

Stakeholders generally agreed that there is not enough permanent or transit accommodation provided across London and the wider South East. Stakeholders highlighted that the design of most current sites cannot expand to accommodate newly forming households. Due to overcrowding on some Gypsy and Traveller sites, and Travelling Showpeople yards, adult children may have to seek sites or yards outside London, or live in bricks and mortar accommodation both within and outside the city.

Some local authorities have invested in improving the quality of Gypsy and Traveller sites. However, stakeholders indicated that some sites and yards in London are in very poor condition, and need maintenance. They added that some sites have problems resulting from their location. These include environmental issues that adversely affect living conditions; and difficulties accessing services.

According to stakeholders, a lack of transit provision for Gypsies and Travellers can lead to roadside encampments. Some London local authorities have responded with borough-wide injunctions to prevent roadside encampments. Others have implemented a negotiated stopping policy, arguably a more 'tolerant' response.

Stakeholders identified a range of barriers that may prevent the development of new sites and yards for GRTTS communities. A lack of suitable and affordable land was identified as a key barrier. Stakeholders pointed to competing pressures for land from different sectors.

A major difficulty for the Roma community is accessing safe and affordable accommodation. As a result, Roma households often end up in poor-quality private rented accommodation, or temporary accommodation.

Stakeholders reported barriers that need to be overcome to enable GRTTS communities to access services. They identified a need for local authorities and agencies to work more closely with GRTTS communities – particularly to address accommodation needs, and enable access to services.

Introduction

- 16.1 This Appendix summarises qualitative data gathered from consultation with key stakeholders in London and the wider South East. A range of stakeholders were invited to take part. (See Appendix 10 for a list of organisations that responded.) For the consultation, we carried out an online survey of local authorities in London and the wider South East, and organisations that provide services for, and represent, GRTTS communities in London. (See Appendix 11 for the stakeholder survey questions.) The survey ran from September to November 2022. It was reopened between October and November 2023 for some local authorities in the wider South East that were (inadvertently) omitted from the 2022 consultation.

Stakeholder survey

- 16.2 The survey was promoted, in various ways, by RRR Consultancy; the GLA; London Councils;³ and GRTTS organisations and affiliated contacts. Promotion methods included emails to over 240 GLA contacts from various agencies and organisations; and social media (e.g., X).
- 16.3 The survey included questions relating to:
- the main accommodation issues experienced by GRTTS communities in London
 - the main barriers to providing new accommodation for GRTTS communities
 - the main patterns of travelling and roadside encampments
 - GRTTS' access to, and use of, services (such as health and education)
 - cooperation between borough departments and service providers regarding issues relating to GRTTS communities, and examples of good practice.
- 16.4 There were 66 responses. Around 60 per cent came from local authorities in London and the wider South East (mainly London-adjacent authorities); around 15 per cent from GRTTS community organisations; and the remainder from organisations such as housing associations.
- 16.5 This Appendix gives an overview of stakeholder comments. Most were about the accommodation needs of Gypsies and Travellers; others concerned these needs within the Roma community. The findings below represent the views of stakeholders consulted, and not necessarily those of the authors or the GLA.
- 16.6 The consultation was only used to enable a qualitative understanding of accommodation and other needs; there was no quantitative analysis of accommodation needs. The qualitative data from the stakeholder consultation gives context for the (mostly) quantitative data taken from household surveys. For example, it sheds light on why overcrowding may occur on pitches and plots.

Accommodation

Gypsies and Travellers

- 16.7 Stakeholders generally agreed that there is a lack of permanent and transit pitches and sites across London.

³ London Councils represents London's 32 boroughs and the City of London Corporation. It is a cross-party organisation.

- 16.8 According to stakeholders from local authorities, and from GRTTS community organisations, a lack of suitable accommodation has led some Gypsy and Traveller households to live in bricks and mortar accommodation. One stakeholder from a GRTTS community organisation estimated that over 80 per cent of Gypsy and Traveller households in London live in conventional housing, due to a shortage of sites and temporary stopping places.
- 16.9 Stakeholders noted that a lack of provision can lead to an increase in unauthorised developments. Households in unauthorised encampments often deal with continual evictions, due to increased enforcement by councils and the police. This situation has been made worse by borough-wide injunctions, and by the Police, Crime, Sentencing and Courts Act 2022 which criminalises nomadism.
- 16.10 Stakeholders from both London and the wider South East reported overcrowding on Gypsy and Traveller sites. They noted that, once children become adults, there is insufficient space to accommodate them in separate caravans. Households on overcrowded sites can suffer from mental health issues, such as depression and anxiety. Overcrowding has led to families living in bed-and-breakfast accommodation or hostels, or outside the boroughs where family members live.
- 16.11 According to a stakeholder from south east London, some Gypsy and Traveller households have had to move outside the local borough to access suitable accommodation:
- “For Gypsies and Travellers the main issue is that there are not enough caravan sites across London. There are no temporary stopping places/transit sites and most existing sites are overcrowded and are sited in places that leave no room to expand. Gypsies and Travellers do not have the same choices that most people have in being able to move to another location because of the lack of sites and those that do exist are usually occupied by one family.”
(Gypsy and Traveller community worker, south east London)
- 16.12 A stakeholder from a GRTTS community organisation said that, due to the issues discussed above – for example, a lack of site accommodation and overcrowding – many households experience poor mental health, isolation, and loss of cultural identity.
- 16.13 The main drivers of accommodation need for Gypsies and Travellers in London, as cited by stakeholders, are:
- demand from overcrowded or concealed households, including young people requiring their own accommodation
 - households in bricks and mortar accommodation who would prefer to live on a site
 - relationship breakdown
 - domestic abuse.
- 16.14 Stakeholders from local authorities and GRTTS community organisations reported that some sites are in places with environmental issues, or where it is difficult to access facilities. According to London stakeholders, sites in or near industrial areas may experience issues such as noise, dust and vermin. Sites created between 1970 and 2000 are often in poor locations for accessing schools, and medical and leisure facilities.

- 16.15 Stakeholders also identified various issues with the condition of sites, including amenities; the standard of amenity buildings; and a lack of communal or open spaces. There is no common standard for amenity buildings on pitches in London. These buildings are different sizes, and often built from poor materials. Some amenity blocks lack hot water and heating, and suffer from damp and mould. There can be issues with windows and doors swelling (so that they can't be opened), and with vents and doors not being fitted properly. There can be drainage issues; and a lack of communal or green spaces.
- 16.16 Some stakeholders reported that local authority-managed sites are poorly managed and maintained. Local authority landlords can be slow to respond to repairs and maintenance issues. According to one stakeholder, one such site in south east London has not been visited by local authority officers in more than two years. As a result, the local authority is unaware of repair and maintenance issues. Unresolved repairs and maintenance issues can make residents feel unsafe.
- 16.17 Several stakeholders noted that the design of most existing sites cannot expand to accommodate newly forming households, leading to overcrowding:
- “Unfortunately [sites] are all very quickly out of date. A family within a generation or two needs to decide to leave or to split up, neither of which is palatable. It would help if you had a larger network of smaller sites which could be close enough to one another to feel linked. As would having larger ones built which weren't immediately filled to capacity.”
(GRTTS representative organisation)
- 16.18 However, stakeholders from London boroughs also gave evidence of local authorities improving sites. A borough in south east London has spent £2m on fire safety works and reconfiguration, to ensure that sites meet fire safety requirements. Similarly, a borough in south west London has submitted a planning application to expand and redevelop a local authority-managed site. This will provide more pitches and a better layout.
- 16.19 According to stakeholders from GRTTS community organisations, site improvements can sometimes have negative impacts. For example, refurbishing one site took more than three years, during which residents lived on a different site in the borough. Revised pitch layouts on another renovated site mean larger mobile homes can no longer be accommodated.
- 16.20 A borough in north London has undertaken extensive research on site design, to ensure that any new sites are well designed and environmentally sustainable. Both the local Gypsy and Traveller community, and site design specialists, were involved in developing site design principles. This means that local government officers in the borough have a good understanding of such principles.
- 16.21 Stakeholders also highlighted a need for more sheltered or supported living schemes, including pitches accessible to disabled people. In this way, older people and those with disabilities can be better accommodated.

Travelling Showpeople

- 16.22 Most Travelling Showpeople households have lived on their yard since it was developed; in some cases, household members were born on the yard. Some yards

are home to three generations of the same family. Stakeholders described how most households have worked and lived in London for generations.

- 16.23 Travelling Showpeople households living on yards and plots in London are involved in various activities, including running circuses, fairgrounds and concession stands. Stakeholders considered Showpeople to be travelling for work, rather than cultural needs, leisure or pleasure. They also noted that they tend to only stop at fair or circus venues, on a pre-arranged basis.
- 16.24 All Travelling Showpeople yards in London are privately owned, with some leased to households by the Showmen's Guild. Most existing provision is located in four boroughs. There are two small family yards. Other yards are large, with a growing number of households on each. Two yards are under threat of closure, to enable the construction of new housing for the settled community.
- 16.25 Stakeholders highlighted a lack of transit and permanent provision for Travelling Showpeople within London. A Travelling Showman stated that they have, for many years, expressed concern about a general shortage of yard provision across London. They also commented that, when the yards were initially developed, there was sufficient space for both accommodation and equipment. However, with more and more people occupying the yards, and larger equipment, they are no longer big enough for both accommodation and storage.
- 16.26 Overcrowding, and a lack of space for equipment on existing yards in London, means that Travelling Showpeople often have to purchase or rent land elsewhere (including outside London). This can lead to security issues, as equipment is more vulnerable to being stolen or damaged when it is stored on land away from Travelling Showpeople.

Roma community

- 16.27 According to stakeholders, members of the Roma community are more likely to live in bricks and mortar accommodation than on sites. Stakeholders also commented that the Roma community is concentrated in a few London boroughs, most significantly in Brent, Newham, Tower Hamlets, Haringey and Wandsworth. Members of the Roma community living in areas with smaller Roma populations may find it difficult to maintain connection with the wider Roma community.
- 16.28 According to Roma community stakeholders, access to safe and affordable accommodation is a key challenge for the community. There is a lack of available and affordable social housing and other housing for members of the Roma community in London. Stakeholders also reported that most Roma households live in private rented housing. Homeless households may end up in temporary accommodation for months or even years. This can negatively affect mental and physical health.
- 16.29 Linked to pressures of availability and affordability, much of the private rented accommodation occupied by Roma households is of poor quality. This includes houses in multiple occupation. However, Roma households do not always aware of where to seek help and support to access suitable accommodation, or of support services. Access to suitable housing is often limited by language barriers; and, for EU nationals, whether they have secured 'settled' status.⁴

⁴ The EU Settlement Scheme offered EU nationals who had been living in the UK prior to its departure from the European Union the opportunity to apply for settled status, which conferred the right to remain in the UK permanently.

- 16.30 According to GRTTS community stakeholders, in some parts of London there are large numbers of the Roma community who are rough sleepers.

Barriers to providing new accommodation for Gypsies and Travellers

- 16.31 According to stakeholders, key barriers to providing new site and yard accommodation include:

- a lack of suitable, affordable land
- constraints imposed by Green Belt policies
- planning processes making it difficult to obtain planning permission
- public opposition to new accommodation, in part because of cultural barriers.

Stakeholders noted that these issues can result in significant delays and difficulties in meeting the accommodation needs of the GRTTS communities.

Identifying suitable land and developing new provision

- 16.32 According to stakeholders, difficulty in identifying suitable land is a major barrier to providing new sites and yards in London. Several of them said the local authorities where they work have insufficient land to meet the needs of Gypsy and Traveller communities, and settled communities. According to one local authority, almost all land within their borough is in active use; has extant planning permission for other uses; or is protected by planning policy for specific purposes (primarily as Metropolitan Open Land, and Strategic Industrial Land). Some London-adjacent authorities noted that Green Belt policies may constrain new provision. Some London authorities shared this view, though to a lesser extent.
- 16.33 According to some local authority stakeholders, when land suitable for sites and yards has been identified, there are competing pressures for development from different sectors – for example, industrial, retail and employment. One borough stated that building social housing is its priority for its own land.
- 16.34 Local authority stakeholders also cited the affordability of land as a key barrier to providing new sites and yards in London. Linked to the point about competing uses, they noted that London landowners may be reluctant to offer land for development as new sites or yards, because they regard alternative uses as more profitable. Stakeholders noted that affordable land is often located in unsuitable areas – such as Green Belt, or areas at risk of flooding.
- 16.35 Stakeholders reported that Green Belt constraints, and the desire to use brownfield sites, may influence the location of new accommodation. They also emphasised that new provision should not be located too far away from existing communities, or too close to industrial areas or major roads.

Planning policy and processes

- 16.36 Local authority stakeholders and those from GRTTS community organisations regarded gaining planning permission for new sites or yards as a significant hurdle. They noted that some planning applications for new provision are initially refused, but later granted on appeal. Applicants sometimes sought planning permission for the minimum feasible number of pitches or plots, intending to seek permission for more

pitches or plots later. This is because smaller sites are more likely to be granted planning permission.

- 16.37 Stakeholders noted that changes to planning legislation, and guidance, have affected how the accommodation needs of different travelling communities are assessed and understood. They commented on how the PPTS 2015 definition means that Gypsies' and Travellers' planning status is based on the extent to which they travel and, potentially, their reasons for travelling.⁵ This is unhelpful when households are less likely to travel, but still live the cultural life of Gypsies and Travellers:

“The restrictive nature of the national Planning Policy for Traveller Sites (2015) definition of ‘Gypsies and Travellers’ means that we cannot require developers to deliver new pitches on privately owned land to meet the needs of our Gypsy and Traveller community. This limits our planning powers to meet need significantly, as suitable sites for new pitches may be located on private land.”

(Borough planning officer)

Cultural barriers and public opposition to new accommodation

- 16.38 Despite London's diversity, and a degree of public interest in GRTTS history and culture, stakeholders reported discriminatory attitudes.
- 16.39 Stakeholders from local authorities and GRTTS community organisations identified these as a key barrier to new provision. Stakeholders commented on how there is often a lack of respect and mutual understanding between travelling communities and the settled community. They noted that public perceptions of the community are often based on media articles about roadside encampments. Media coverage of Gypsy and Traveller communities, both nationally and locally, is often negative. Negative social media coverage can increase tensions between communities.
- 16.40 Negative perceptions are linked to the difficulties securing planning permission described above. This is because public opposition to proposals for new sites or yards makes it less likely permission is granted. Stakeholders considered that negative perceptions affect local councillors' attitudes – which are significant when it comes to granting planning permission for new sites. It is important, stakeholders said, for local authorities to consider how they might respond to potential opposition to the development of new provision. This will require planning departments to work with other borough departments and agencies.
- 16.41 Stakeholders noted that a lack of trust between GRTTS communities and local authorities can affect building effective relationships. One reason for this lack of trust is that, for some members of GRTTS communities, their only contact with local authorities may relate to unauthorised developments or encampments.

Overcoming barriers

- 16.42 Stakeholders suggested how the barriers discussed above could be overcome. They said additional funding is needed to help deliver new provision – including feasibility and design work, as well as buying land and developing sites. They also cited a need for additional resources, from the Mayor, to support local authorities' work to identify

⁵ Note that the stakeholder consultation occurred before PPTS was revised in December 2023 and subsequently in 2024.

sites to meet need at the subregional level.⁶ Subregional approaches, supported by additional resources from the Mayor, would – according to stakeholders – be beneficial in situations where there is not enough land to meet needs locally.

- 16.43 According to stakeholders from local authorities, training around history and culture would help organisations and agencies better understand the needs of London’s GRTTS communities. This could improve agencies’ and organisations’ engagement with GRTTS communities, and help foster better relations.
- 16.44 Stakeholders emphasised the need to understand the cultural traditions and specific identity of each GRTTS community. Travelling Showpeople commented on how differences between GRTTS communities are not always acknowledged. They noted that they regard themselves as separate from Gypsy, Traveller and Roma communities.
- 16.45 Stakeholders suggested that it is important to empower GRTTS communities and build capacity, to enable them to engage with decision-making processes. This requires culturally sensitive outreach work, using community languages.
- 16.46 Stakeholders suggested local authorities and housing associations should better collaborate to provide new accommodation for GRTTS communities. They also commented that providing small sites or group housing as part of new housing developments would help with community integration and cohesion.⁷
- “Housing associations could and should be made to engage with local authorities to include the provision of sites within new developments and planning permissions could be withheld if no provision is included. There should be no difference between housing associations and developers building accommodation for social renting or even part buying for the general population and accommodation for Gypsies and Travellers.”
(Housing officer, London)
- 16.47 According to London local authority planning and housing stakeholders, there is a need for London-specific planning guidance to share good practice in relation to delivering new sites and yards.

Transit provision, travelling patterns, and roadside encampments

- 16.48 Stakeholders from local authorities noted that some Gypsy and Traveller households (those residing on sites, and those in bricks and mortar accommodation) do not travel as often as they used to, or may even have ceased to travel. They suggested this may be due to strong familial connections to the local area, and so that households with children can access schools. Another factor is the Police, Crime, Sentencing and Courts Act 2022. Stakeholders suggested that, by criminalising roadside encampments, this Act (which became law shortly before the survey) may discourage households from travelling. Some stated that COVID-19 and associated restrictions meant that households were less likely to travel in 2020 and 2021. Other

⁶ The terms on which existing Mayoral funding is available do not preclude support for subregional provision.

⁷ Group housing consists of small groups of purpose-built bungalows, including space for caravans designated for use by Gypsies and Travellers. These schemes may include additional facilities such as communal areas; and are tailored to meet the specific needs of Gypsy and Traveller families. The approach to these schemes can vary depending on local context and planning policies. In some instances, group housing schemes for Gypsies and Travellers are developed as standalone projects. In other cases, group housing schemes can be integrated into or developed adjacent to traditional Gypsy and Traveller sites.

reasons cited included the cost of travelling and a lack of transit provision, both throughout London and nationally.

- 16.49 It is evident that some GRTTS households do still travel. Stakeholders identified the main reasons: to be close to friends and family; for work-related reasons; for holidays; and to attend funerals and weddings. They suggested Gypsy and Traveller households may travel to reinforce cultural identity. Households who live on sites often travel over school holidays – to visit family in other areas of the country or abroad, or to attend fairs. Sometimes, men from Gypsy and Traveller communities may travel for work, whilst women remain at home.
- 16.50 A stakeholder from a London-adjacent authority stated that, in spring and summer, the same Irish Travellers pass through the borough, mainly for holidays or work. A stakeholder from south east London reported often seeing Travellers from European countries passing through their borough.
- 16.51 Travelling Showpeople, who travel for work, tend not to live on roadside encampments. However, stakeholders suggested that London local authorities need to be more flexible around how long Travelling Showpeople can reside on event grounds before or after events. They also noted a need for transit provision for Travelling Showpeople visiting local areas when holding events.
- 16.52 There was no agreement between stakeholders on whether the number of roadside encampments in London and the wider South East has increased or decreased over recent years. (See paragraph 3.38 for discussion of MHCLG data regarding caravans on unauthorised pitches.)
- 16.53 However, they made several points regarding unauthorised encampments. First, that these are most likely to take place in spring and summer. They also tend to increase in specific areas when events (such as weddings, funerals or fairs) take place. They commonly occur where open land (such as green spaces or car parks) is available. They may take place when households are working in local areas. For example, one borough experienced 15 roadside encampments over two years, involving households who were working in the local area. According to some local authorities from the wider South East, the main reason for roadside encampments is a lack of authorised sites, including transit provision. Stakeholders reported that unauthorised encampments may lead to incidents of fly-tipping or leaving rubbish behind. GRTTS households residing on roadside encampments may find it particularly difficult to access local services.
- 16.54 A stakeholder from a London borough noted that roadside encampments may also be occupied by Gypsy and Traveller households from the wider South East who live in bricks and mortar accommodation.
- 16.55 Possibly because most Roma households live in conventional housing, stakeholders made fewer comments regarding the Roma community and roadside encampments. However, they suggested that roadside encampments can involve homeless members of the Roma community who are rough sleeping, and who often stay in larger family groups for safety.
- 16.56 In terms of local authorities' responses to unauthorised encampments, some London local authorities have implemented borough-wide injunctions to deter roadside encampments. Stakeholders from two London boroughs stated that borough-wide injunctions have led to a decrease in roadside encampments in the last few years. Responding differently to roadside encampments, a borough in north London has

implemented a negotiated stopping policy that they believe works well. Another London borough responds to roadside encampments on a case-by-case basis, with responses ranging from a 'tolerated' stance, to using courts and bailiffs.

Access to local services

16.57 The stakeholder survey asked about the extent to which London's GRTTS communities can access local services. It asked respondents to identify services they believe members of London's GRTTS communities find difficult to access. Table 16.1 indicates that a significant proportion of stakeholders perceive access to a broad range of services as difficult.

Table 16.1: Services that, according to respondents, GRTTS communities find it difficult to access

Service	Number of stakeholders	%
Mental health care	26	39%
Further/higher/adult education	22	33%
Secondary education	20	30%
A local GP practice	20	30%
Other	19	29%
Adult social care	17	26%
Support for older people	17	26%
Children's social care	16	24%
Primary education	14	21%
Policing	12	18%
Emergency healthcare	10	15%

16.58 The following summarises stakeholders' comments regarding the main barriers preventing GRTTS communities from accessing services:

- Language and literacy issues: English is a second language for some members of GRTTS communities (in particular, the Roma community); others have poor literacy skills. Stakeholders suggested that younger members of GRTTS communities are likelier to know how to access services than older members, who may be less literate.
- Digital exclusion: Members of GRTTS communities may lack the digital skills or facilities to access the internet. This can lead to a lack of knowledge about available services, and how best to access them.
- Cultural misunderstanding means that agencies and organisations may lack an understanding of GRTTS communities' support needs. For example, housing providers may assume that accommodation needs are the same for members of the Roma community as for Gypsies and Travellers, when they may differ. Agencies and organisations can also lack flexibility in engaging with GRTTS communities. Some agencies may be reluctant to visit Gypsy and Traveller sites and yards.
- Lack of trust around services, housing officers and support workers who visit sites, on the part of GRTTS communities.
- Poor signposting by agencies and organisations as to where GRTTS communities can access services.
- A lack of a permanent address may mean that members of GRTTS communities cannot access health services – for example, doctors and dentists.
- Site location: some site locations make it difficult to access facilities.

16.59 According to a stakeholder from a GRTTS representative organisation:

“For things like Council-administered benefits (housing benefit, council tax support, discretionary schemes) and housing, little is done to adapt services for non-English speaking residents generally, which then has significant effect on Roma being able to access/navigate these services. The roll-out of the EU Settlement Scheme can sometimes be used as another way to gate-keep services, for example, people with pre-settled status may be denied support unless they first understand/present their eligibility (rules around right to live can be complex).”

(GRTTS representative organisation)

- 16.60 Stakeholders commented that it is difficult for Roma individuals sleeping rough to access housing services. This is particularly the case for those who arrived after December 2020, and thus may be ineligible for settled status under the EU Settlement Scheme. Consequently, they cannot access private or social rented housing.
- 16.61 According to a GRTTS representative organisation, GRTTS households living in areas with poor transport links find it harder to access local services. Whilst stakeholders recognised that some GRTTS households may experience mental health issues (particularly those residing on roadside encampments), there are few support services specifically designed for GRTTS communities requiring support. Stakeholders suggested that the Police, Crime, Sentencing and Courts Act 2022 has led to increased mental illness amongst Gypsy and Traveller households.
- 16.62 Difficulties accessing services may have serious consequences for GRTTS households. For example, difficulties in accessing services can lead to feelings of isolation. A stakeholder cited research by the NHS and other national evidence that shows poor access to services may result in lower life expectancy and educational attainment.

Improving access to services

- 16.63 Stakeholders suggested that service providers may need to adopt a more proactive approach to ensure that GRTTS communities are aware of, and can access, services. Some local authorities in the wider South East have taken proactive steps by assisting occupants of existing sites to access services – for example, by helping them complete forms.
- 16.64 A borough in north London works alongside education and health workers, the Traveller Movement, and Roma support organisations to deliver cultural competency workshops to staff. They have also delivered multidisciplinary workshops with staff from departments across the local authority, as part of the Safeguarding Children Board’s training programme.
- 16.65 A borough in south east London undertakes welfare checks on GRTTS households residing on roadside encampments. It signposts families to relevant local services – for example, health care, dentists, and shops.
- 16.66 Several boroughs work with health agencies and organisations to support members of GRTTS communities. A borough in south east London is working with a GP practice to determine the health needs of GRTTS communities. The borough is also undertaking outreach work with the early intervention and family support service for early years literacy.

16.67 The organisation Doctors of the World operates mobile clinics in a north London borough. These:

- help GRTTS families to register with GPs
- assess the families' health requirements
- help with access to dental, sexual health and pregnancy services
- offer advice on health costs.

A stakeholder from another borough in south east London stated that their Culture and Communities Team has a good relationship with the local Irish Centre's Gypsy and Traveller outreach workers. A borough in north London works closely with independent organisations, such as the LGT accommodation service, as well as education services and the safer neighbourhood team.

16.68 Buckinghamshire Council has implemented a specific strategy to address educational needs. It has appointed a dedicated education officer, who visits sites and arranges school placements for children.

16.69 In a north London borough, two GRTTS Family Liaison Officers work in schools to support GRTTS children. However, some children may not receive support from these officers, because their families do not inform schools of their GRTTS identity.

16.70 The same north London borough has been helping GRTTS adults to access training and employment opportunities. The borough supported 17 members of GRTTS communities to access training and employment opportunities over three months. They have appointed a GRTTS employment support worker, to further support GRTTS communities to access training and employment opportunities.

Services' communication and coordination

16.71 Stakeholders commented on whether borough departments and other service providers (for example, health, education, police) communicate and coordinate well in meeting the needs of GRTTS communities. Stakeholder responses differed widely from 'poor' to 'very good'.

16.72 There is good evidence of boroughs collaborating and communicating with both internal and external agencies and services. For example, a north London borough has set up a Gypsy, Roma and Traveller Project Board – every six weeks, 75 partners from the borough and other organisations meet. The borough also has 10 thematic groups – people from internal departments⁸ and external agencies meet monthly. They are currently designing action plans aimed at removing barriers for GRTTS communities in relation to health, wellbeing and education.

16.73 However, some stakeholders reported limited communication and collaboration, highlighting the need for improvement. For example, a stakeholder from a London-adjacent local authority reported little in the way of joined-up working between borough departments, or between the borough and external agencies and services, with regard to GRTTS' needs. Stakeholders cited challenges to taking a more proactive approach, including limited internal communication between departments such as planning, housing, health, social care, and education.

⁸ Internal departments include Community Safety, Financial Inclusion, Education, Employment, Site Delivery, Customer Journey and Experience, and Heritage and Culture.

- 16.74 Others identified specific areas for improvement: a stakeholder from a north east London borough stated: “We feel our work would benefit from greater collaboration between planning and housing teams within the Council on accommodation needs.”
- 16.75 Some local authority stakeholders suggested that communication and collaboration were improving. One stakeholder from a north London borough stated that coordination had been “poor in the past but much better recently”, adding: “There is more emphasis on political support and backing.”
- 16.76 There is less evidence of collaboration and communication across borough borders. A stakeholder from a local authority adjacent to London suggested this may reflect weaker relationships across wider geographies: “Within the county we are able to coordinate quite well. This becomes trickier when outside of the county as we do not have the same partnerships as we do within it.” However, there are some examples of efforts to address cross-boundary issues and accommodation needs. Some local authorities in west London, and members of the Essex Planning Officers’ Association, collaborate in this way.
- 16.77 Respondents also referred to the pan-London Roma Operational Group, managed by the GLA Rough Sleeping Team, as a positive example of cross-sector engagement. This group exemplifies how various sectors, including statutory and voluntary organisations, can collaborate effectively to support Roma individuals sleeping rough in London.

Appendix 17: Policy background

Definition of Gypsy and Traveller

- 17.1 This GTANA was commissioned by the GLA on the basis that it reflected, in its assessment, the draft London Plan (2018) definition of Gypsies and Travellers (as well as the PPTS definition). Following the publication of PPTS 2024 – which contains an updated definition, broader in scope than its predecessor – these definitions are now considered to align.
- 17.2 While this GTANA was being prepared, the accommodation needs of households that met the PPTS and draft London Plan definitions were, initially, calculated separately. This was to ensure an inclusive approach. Prior to PPTS 2024, PPTS definitions were narrower in scope than the draft London Plan definition, and excluded some Gypsy and Traveller households. With a more inclusive definition in PPTS 2024, this separate calculation is no longer necessary. This is because the two definitions are, for practical purposes, considered the same. As such, need figures calculated using the draft London Plan definition are identical to those calculated using the PPTS 2024 definition.
- 17.3 For six boroughs, the GTANA incorporates need for households living on sites identified in the borough GTANA and, where applicable, the local plan. While the six GTANAs were completed before PPTS 2024, they identify needs for households meeting the cultural/draft London Plan definition, and those meeting the now-superseded PPTS 2015. As stated above, the draft London Plan and PPTS 2024 definitions are considered to align.
- 17.4 The definitions do not apply to Roma households.

Draft new London Plan 2017

- 17.5 The Mayor published his draft new London Plan 2017 on 1 December 2017. He consulted on it for three months between 1 December 2017 and 2 March 2018. The draft new London Plan 2017 contained a broad definition of Gypsies and Travellers, based on cultural identity:
- People with a cultural tradition of nomadism, or living in a caravan, whatever their race or origin, including:
- 1) those who are currently travelling or living in a caravan
 - 2) those who currently live in bricks and mortar-dwelling households whose existing accommodation is unsuitable for them by virtue of their cultural preference not to live in bricks and mortar accommodation
 - 3) those who, on grounds of their own or their family's or dependants' educational or health needs or old age, have ceased to travel temporarily or permanently.
- 17.6 In 2017, the GLA published a Gypsy and Traveller Accommodation Topic Paper. The paper provided detailed justification for definition, contained in the draft new London Plan 2017, of Gypsies and Travellers. This recognises the accommodation needs of all Gypsies and Travellers – whether they have ceased to travel or not, or whether they live on sites or in bricks and mortar accommodation.

Draft London Plan 2018

- 17.7 Following consultation on the draft new London Plan 2017, the Mayor considered the responses. In 2018, he published his draft new London Plan, showing minor suggested changes. This contained the same definition of Gypsies and Travellers as the draft new London Plan (2017), but with the addition of “a nomadic habit of life”, as follows: “People with a cultural tradition of nomadism, a nomadic habit of life, or living in a caravan, whatever their race or origin.”

London Plan Examination in Public and Inspectors' Report

- 17.8 In July 2019, the Mayor of London published the draft new London Plan (2019) – consolidated suggested changes version. This includes the Mayor's suggested changes that arose during the Examination in Public.
- 17.9 In October 2019, the Inspectors' Panel report from the Examination in Public into the London Plan recommended that the wider definition of Gypsies and Travellers, based on cultural identity, should be removed. This was to ensure consistency with national policy (Annex 1 PPTS 2015).
- 17.10 The Mayor made further modifications to the Plan in response to the Inspectors' Panel report. However, he retained the broader definition; and notified the Secretary of State of his intention to publish the London Plan on 9 December 2019 (Intend to Publish London Plan (December 2019)).
- 17.11 On 13 March 2020, the Secretary of State directed the Mayor, under section 337 of the Greater London Authority Act 1999, to accept the Inspectors' recommendations on some matters:
- “[The Mayor's] intended policy H14 is inconsistent with national policy set out in the Planning Policy for Traveller Sites (PPTS) (August 2015) as it introduces a wider definition of ‘gypsies and travellers’ compared to that in Annex 1 of the PPTS and would include those who have permanently settled.”
- 17.12 The Secretary of State also directed the Mayor to decapitalise references to Gypsy/Gypsies and Traveller(s) throughout the policy and supporting text.

Publication London Plan

- 17.13 In December 2020, the Mayor formally approved a version of the London Plan for publication, with final publication pending the approval of the Secretary of State. This version was prepared to address the Secretary of State's directions relating to the Intend to Publish plan. As a result of the directions, the Plan omits the definition of Gypsies and Travellers from Policy H14; and decapitalises Gypsies and Travellers throughout the Plan.

London Housing Strategy (2018)

- 17.14 The London Housing Strategy (2018) emphasises the need for London local authorities to actively plan to meet the accommodation requirements of London's Gypsies and Travellers.⁹ This includes developing permanent sites, and protecting

⁹ GLA, [London Housing Strategy](#), May 2018

and improving existing capacity. The Strategy states that councils should plan to meet the identified need for permanent pitches by:

- carrying out needs assessments based on a new definition of Gypsies and Travellers which, “unlike the Government’s planning definition, includes people who are currently living in bricks and mortar accommodation”
- actively planning to protect existing capacity, including taking this into account when considering new residential developments.¹⁰

17.15 The Strategy also states that the Mayor will work with Gypsy and Traveller communities, and councils, to provide funding for new sites and improvements for existing sites through his Affordable Homes Programmes.¹¹

17.16 Although the Strategy does not explicitly refer to the Roma community, it does state that rates of overcrowding in London are higher among those from Black, Asian and minority ethnic communities, even after allowing for variations in household size. It also suggests that women, and those from Black, Asian and minority ethnic groups, are over-represented among those experiencing homelessness.¹²

¹⁰ See paragraph 5.42 on p.152 of the [London Housing Strategy](#), May 2018.

¹¹ For more information, see: GLA, [Homes for Londoners: Affordable Homes Programme 2021-2026](#)

¹² See paragraph 2.16 on p.34 of the [London Housing Strategy](#), May 2018.
