

Socially Responsible Investment Policy 2018/19

1. Introduction

The Investment and Accounts Committee (“the Committee”) is aware of its fiduciary responsibility to obtain the best possible financial return on investments, within acceptable levels of risk. This is the Committee’s principle concern when making investment decisions on behalf of the Newham Pension Fund.

However, the Committee is committed to being a responsible investor and supports the view that effective management of environmental, social and governance (ESG) issues is a necessary part of achieving good financial performance and long term growth in the companies in which it invests, and will lead to greater returns in the long term.

It is the Committee’s view that companies that fail to effectively manage good governance and social and environmental risks can incur higher operating costs (e.g. through lawsuits, fines, impact on staff recruitment and retention etc.) and loss of consumer and investor confidence, negatively impacting on shareholder value. Conversely, good corporate governance and social and environmental practice can help to enhance the reputation of companies, which in turn has a favourable effect on financial performance and long term sustainability.

The Committee’s responsibility for reviewing policy on social, environmental and ethical considerations, and on the exercise of voting rights is laid out in the Fund’s Investment Strategy Statement (ISS). As part of fulfilling this responsibility, the Fund has developed this Socially Responsible Investment Policy (SRI) which outlines its approach to the management of ESG issues within its investment portfolio.

2. Shareholder Rights and Voting Activities

The Fund wishes to promote corporate social responsibility, good practice and improved performance amongst all companies in which it invests. At the very least, companies are expected to comply with all applicable laws and regulations in home markets and to conform to local best practice when operating overseas.

The Fund is committed to making full use of its shareholders rights. The Fund delegates the exercise of these rights to its fund managers. Fund managers are expected to vote in an appropriate and informed manner and report their voting actions back to the Committee. Where possible, the fund seeks to exercise voting rights attached to its non-UK equity holdings by delegation through Power of Attorneys. The Fund receives a monthly report from its Custodian on the voting activities of fund managers, and this is circulated to all Committee members via a restricted SharePoint site.

In addition to voting, the Fund works in partnership with its custodian to return value back to the Fund through class actions where shareholder value has been lost through fraudulent or irresponsible corporate behaviour.

3. Shareholder Engagement

The Fund also delegates ESG engagement with and monitoring of investee companies to fund managers. Fund managers are expected to report back to the Committee on the activities they undertake, and report any breaches by investee companies.

Fund managers are encouraged to have their own policies on the inclusion of ESG issues in their investment decisions and management, and to report back to the Committee on how these policies are implemented.

ESG issues will be included as a standing item at meetings with fund managers.

Fund Manager internal control reports are monitored, with breaches reported back to the Committee.

4. Restrictions on Investments

As stated in the ISS, the Fund will consider excluding certain types of investment from its actively managed portfolios, following appropriate advice on the implications for performance and diversification.

However, the Fund avoids placing excessive restrictions on its external fund managers, recognising that this could reduce the accountability of those managers, impact financial performance and limit opportunities for improving company behaviour through active shareholder engagement.

Fund managers are instructed not to invest segregated elements of their portfolio in companies that generate over half of their income from tobacco products on investment prospects grounds.

5. Compliance with Codes and Principles

As part of its ISS, the Fund publishes details of its compliance with both the Myner's principles and the FRC Stewardship Code, both of which include principles on responsible ownership and the monitoring of investee companies.

The Fund is supportive of the UN Principles of Responsible Investment (UNPRI), which seek to provide a framework by which investors can incorporate ESG issues into their decision making and ownership practices. Fund Managers are encouraged to be UNPRI signatories or are required to explain areas of non-compliance.

6. Collaboration

The Fund recognises that its influence on individual companies can be enhanced through collaboration with other institutional shareholders, and will collaborate on ESG and voting issues where appropriate and possible.

The Fund is a member of the Local Authority Pension Fund Forum (LAPFF). LAPFF's aim is to maximise their influence as shareholders while promoting corporate social responsibility and high standards of governance among companies in which they invest. The LAPFF comprises 65 UK public funds which engage as a united front with investee companies on issues such as climate change, child labour and breaches of best practice including the UK Code on Corporate Governance. Executive remuneration is an important governance issue for LAPFF and is focused on the subject of incorporating non-financial performance metrics into long term reward.

The LAPFF provides ad hoc briefings on companies where contentious votes are due or there are serious corporate governance failings or concerns. Where these relate to companies within the Fund's portfolio, these concerns are raised with the relevant fund manager and appropriate action is taken. Where LAPFF issue a voting direction on a particular issue, fund managers will be expected to comply with this or explain any deviance.

The Fund also pursues engagement with companies through membership of the Institutional Investors Group on Climate Change (IIGCC), one of the core objectives of which is to engage in dialogue on environmental issues.

7. Feedback

Any feedback on this SRI Policy is welcomed. If you have any comments or wish to discuss any issues then please contact
